Climb to the Top

The image shows a 3x3 grid of ten-frames. Each ten-frame is a 2x10 grid of cells, with a horizontal line separating the top five cells from the bottom five cells. The configurations of grey circles are as follows:

- Top Row:**
 - Left: 10 circles in the left column, 0 in the right column.
 - Middle: 9 circles in the left column, 1 circle in the bottom cell of the right column.
 - Right: 9 circles in the left column, 2 circles in the bottom two cells of the right column.
- Middle Row:**
 - Left: 10 circles in the left column, 3 circles in the bottom three cells of the right column.
 - Middle: 9 circles in the left column, 3 circles in the bottom three cells of the right column.
 - Right: 9 circles in the left column, 5 circles in the bottom five cells of the right column.
- Bottom Row:**
 - Left: 10 circles in the left column, 6 circles in the bottom six cells of the right column.
 - Middle: 10 circles in the left column, 6 circles in the bottom six cells of the right column.
 - Right: 10 circles in the left column, 6 circles in the bottom six cells of the right column.

Number Cards

Subtracting

A game board for subtraction. It features a 'Start' token on the left, which is a white rectangle with a jagged left edge and a jagged right edge. To the right of the 'Start' token is a path of numbered squares. The path starts with a square containing the number 2, followed by a square with 3, and a square with 6. From the 6 square, the path goes down to a square with 8. From the 8 square, the path goes left to a square with 2, then a square with 5, a square with 9, a square with 4, and a square with 7. From the 7 square, the path goes down to a square with 3. From the 3 square, the path goes down to a square with 6, then a square with 8, a square with 7, a square with 4, and a square with 5. From the 5 square, the path goes down to a square with 9, and finally to a square with 2.
